

# GET WINTER READY

with  
**BELL FUELS** 

Winter is right around the corner, which means it's time to start thinking about how to protect your vehicles from cold weather fuel issues. Searching for the right products can be an exhaustive and expensive task, but luckily Bell Fuels has you covered with Bell's Premium D-2 ® Ultra Low Sulfur Diesel.

Using the Premium D-2 ® Package lowers the Cold Filter Plug Point (CFPP) by a minimum of 20 degrees. In addition to providing cold weather protection, Premium D-2 ® Ultra Low Sulfur Diesel is much less expensive than treating your fuel with #1 diesel fuel.

Don't take our word for it though:

*"Their Fuel Needs Analysis solution delivered a Winter Blend Plan - no matter the weather or temperature they were out on the road with fuel that worked; never any plugged fuel filters. Within 24 hours of a storm coming in, they were ready. With Bell being local, they understood the custom blend required."*
